Benefits

Cloud based service

No installations, updates or backups needed. Logging in to the web service is possible from computers, tablets or smartphones wherever you are.

Statistics

Kitchen Manager ® allows you to easily access all the statistics you might need. You have access to finances and service history, as well as previous service rapports that come with every individual machine. Making a budget, warranty times, follow ups and optimising has never been easier. Have control over your firm's economy and the status of your kitchen equipment.

Job Order

A digital job order is created for every time you troubleshoot and includes all information about the technicians work.

Service History

Previously made repairs on your equipment is saved.

Equipment Overview

All your kitchen equipment in one place. A detailed list with pictures and information about your kitchen equipment. A clear overview will help you accomplish necessary arrangements without hassle and long waiting times. Moreover, it helps the technician to order the right parts, saving time consuming visits and costs.

Budgeting

Simplify budgeting and keep track of your warranties with service history.

Troubleshoot

Misunderstandings are now long gone. With our web service you can report malfunctions on your terms. Kitchen Manager ® creates a clear and detailed report with pictures. Eliminating confusion about place, equipment and what the fault is. Management becomes effortless with a coherent picture of the malfunction and access to previous repairs. No unnecessary extra costs for preliminary investigations.

QR Quick-FA

Every equipment in the kitchen gets a QR-code that can be scanned with any smartphone. Making troubleshooting to the right service company even easier. You just have to scan the QR, authenticate yourself on Kitchen Manager ® with a simple 4 digit code, fill in a report of what's malfunctioning and send. Done!

Every QR-code application on both Apple Store and Google Play works excellently.
